**TARIFF FORMAT**

- A. **Page Numbering** ■ Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added.
- B. **Page Revision Numbers** ■ Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of the various suspension periods and deferrals the Commission follows in its tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect. Consult the check sheet for the page currently in effect.
- C. **Paragraph Numbering Sequence** ■ There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
  - 2.1
  - 2.1.1
  - 2.1.1(A)
  - 2.1.1(A)(I)
  - 2.1.1(A)(1)(a)
  - 2.1.1(A)(1)(a)(I)
  - 2.1.1(A)(1)(a)(I)(i)
  - 2.1.1(A)(1)(a)(I)(i)(1)
- D. **Check Sheets** ■ When a tariff filing is made with the Commission an updated check sheet accompanies the filing. The check sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There shall be no other symbols used on this page if these are the only changes made to it. The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

## SECTION 2.0 - REGULATIONS, (CONT'D.)

## 2.7 Payment and Billing, (Cont'd.)

2.7.8 The Company may demand immediate payment under the following circumstances:

- (A) Where Service is terminated or abandoned.
- (B) Where actual usage is two times greater than the Customer's average usage as reflected on the monthly bills for the three months prior to the current bill or, in the case of a new Customer who has been receiving Service for less than four months, where the actual usage is twice the estimated monthly usage charge.
- (C) Where the Company has reason to believe that a Business Customer is about to go out of business or that bankruptcy is imminent for that Customer.

2.7.9 A charge of \$20.00 will apply whenever a check, draft, or electronic funds transfer presented for payment for service is not accepted by the institution on which it is written.

2.7.10 The security of Authorization Codes used by the Customer or its Authorized Users are the responsibility of the Customer. (T)

2.7.12 The minimum period for which services are provided and for which rates and charges are applicable is one (1) month unless otherwise specified in this tariff or by mutually agreed upon contract. SECTION 2.0 - REGULATIONS, (CONT'D.)**2.8 Deposits**

The Company reserves the right to examine the credit record of the Customer, using any lawful sources for determining credit standing. If the Customer's financial condition is unknown or unacceptable to the Company, the Customer may be required to provide the Company with a security deposit which the Company may apply against overdue charges. The amount of the security deposit shall be equal to three months' estimated usage but may vary with the Customer's credit history and projected usage. The Customer shall be apprised that after one year of service the Account shall be reviewed, and in the event that all amounts due have been paid within the terms and conditions of this tariff, the deposit shall be refunded in full. If subsequent payment or usage patterns change, the Company may request an increase in or resubmission of the security deposit as appropriate. The Company may also require a security deposit before service is restored (along with the payment of overdue charges) from the Customer whose service has been discontinued for nonpayment of overdue charges. Such security deposit may be based on a new credit history (taking into account the discontinuance of service) and estimates of usage. The fact that a security deposit has been made in no way relieves the Customer from the prompt payment of bills upon presentation.

**SECTION 3.0 - GENERAL DESCRIPTION OF SERVICE, (CONT'D.)****3.2 Timing of Calls**

Billing for calls placed over the Company's network is based in part on the duration of the call as follows, unless otherwise specified in this tariff:

- 3.2.1 Timing of each call begins when the called station is answered (i.e. when two way communications are established.) Answer detection is based on standard industry answer detection methods, including hardware and software answer detection. For Collect Calls, charges apply only if the called party accepts the responsibility for payment. For Person to Person Calls, charges apply only if the calling party is connected with the designated called party or an agreed upon substitute.
- 3.2.2 Chargeable time for calls ends when one of the parties disconnects from the call.
- 3.2.3 Unless otherwise specified in this tariff, the Initial Period for billing purposes is one (1) minute.
- 3.2.4 Unless otherwise specified in this tariff, Additional Period billing for usage after the Initial Period is in full one (1) minute increments.
- 3.2.5 The Company will not knowingly bill for unanswered calls. When a Customer indicates that he/she was billed for an incomplete call, the Company will reasonably issue credit for the call.
- 3.2.6 Time of day designations are used in this tariff to indicate rate period boundaries. Rate periods begin at the first time of day designation and continue up to but not including the second time of day designation.
- 3.2.7 Calls will be billed at the rate in effect during the call, with two rates applied if the call spans over more than one billing rate period.

**SECTION 3.0 - GENERAL DESCRIPTION OF SERVICE, (CONT'D.)****3.4 Calculation of Distance**

For mileage sensitive services, the distance between originating and terminating points of a call or private line facility are determined using vertical ("V") and horizontal ("H") coordinates for the serving wire center(s) or the Company access point(s) associated with the call or facility. For purposes of determining the airline mileage of a call the Company references the V and H coordinates as found in Telcordia's V&H Tape and NECA FCC Tariff No. 4. The use of coordinates for wire centers versus access points and the method for calculating actual distances varies based on the type of service and the form of access used to reach the Company network. (T)

For non-switched private line services, mileage measurements are based on the distance in airline miles between the Company access points associated with each end of the circuit. Distance measurements are determined using the mileage calculation method shown in Section 3.4.1. (T)

For outbound and inbound switched long distance services utilizing Switched Access Origination, mileage measurements are based on the airline distance between serving wire centers associated with the originating and terminating points of the call. The serving wire centers of a call are determined by the area codes and exchanges of the origination and terminating points. Distance measurements are determined using the mileage calculation method shown in Section 3.4.2. (T)

For outbound switched long distance services utilizing Special Access Origination, mileage measurements are based on the distance in airline miles between the Company access point associated with the station utilizing Dedicated Access Lines and the serving wire center associated with the called station. Distance measurements are determined using the mileage calculation method shown in Section 3.4.2. (T)

For inbound switched long distance services utilizing Special Access Termination, mileage measurements are based on the distance in airline miles between the serving wire center associated with the calling station and the Company access point associated with the station utilizing Dedicated Access Lines. Distance measurements are determined using the mileage calculation method shown in Section 3.4.2. (T)

**SECTION 3.0 - GENERAL DESCRIPTION OF SERVICE, (CONT'D.)****3.4 Calculation of Distance, (Cont'd.)****3.4.1 Calculation Method for Private Line Services**

The following steps describe the procedure for calculating mileage distances for private line services:

**Step 1:** Obtain the "V" and "H" coordinates for the Company access points serving the originating and terminating locations.

**Step 2:** Obtain the difference between the "V" coordinates. Obtain the difference between the "H" coordinates. The difference is always obtained by subtracting the smaller coordinate from the larger coordinate. (T)

**Step 3:** Square the differences obtained in Step 2.

**Step 4:** Add the squares of the "V" difference and "H" difference obtained in Step 3.

**Step 5:** Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

**Step 6:** Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the wire centers and/or access points.

The following steps describe the procedure for calculating mileage distances for switched long distance services:

- Step 1:** Obtain the V and H coordinates for each rate center.
- Step 2:** Obtain the difference between the V coordinates of the two rate centers. Obtain the difference between the H coordinates. The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.
- Step 3:** Divide each of the differences obtained in 2. by three, rounding each quotient to the nearer integer.
- Step 4:** Square these two integers and add the two squares. If the **sum** of the squares is greater than 1777, divide the integers obtained in 3. by three and repeat step 4. Repeat this process until the sum of the squares obtained in 4. is less than 1778.
- Step 5:** The number of successive divisions by three in steps 3. and 4. determines the value of N. Multiply the final sum of the two squares obtained in step 4. by the multiplier specified in the following table for the value of N preceding.

<b>N</b>	<b>Multiplier</b>	<b>Minimum Rate Mileage</b>

**Step 6:** Obtain square root of product in 5. and with any resulting fraction, round up to next higher integer. This is the message rate mileage except that when the mileage so obtained is less than the minimum rate mileage shown in 5. preceding, the minimum rate mileage corresponding to the N value is applicable.

**Example:** Calculate distance from Phoenix City, Alabama and Atlanta, Georgia.

	V	H
(1) Atlanta	7260	2083
Phoenix City	7559	2047
(2) Difference between Vs & Hs	299	36
(3) Dividing each difference by three & rounding to nearer integer equals 100 and 12.		
(4) Squaring integers & adding	100x 100=	1000
	12 x 12=	<u>264</u>
Sum of squared integers		10264
(5) Sum of integers is greater than 1777, so divide integers in(3) by three & repeat (4).		
(6) Dividing integers in(3) by three & rounding equals 33 and 4.		
(7) Squaring integers and adding,	33 x 33=	1089
	4 x 4=	<u>16</u>
Sum of squared integers		1105
(8) The sum of the squared integers is less than 1778 and was obtained after two successive divisions by three, therefore, N = 2.

SECTION 3.0 ■ GENERAL DESCRIPTION OF SERVICE, (CONT'D.)

## 3.4 Calculation of Distance, (Cont'd.)

## 3.4.2 Calculation Method for Switched Services, (cont'd.)

## Example, (continued)

- (9) Multiply final sum of squared integers by factor 8.1 (corresponding to N-2).

1105

x 8.18950.5

---

- (10) Square root of 8950.5-94 and a fraction which is rounded up to 95 miles (fractional miles being considered full miles). The 95 miles is larger than the minimum of 4 1 rate miles applicable when N-2, so the message rate mileage is 95 miles.
